ANSWERS

1. Store water in clean plastic containers, consider purchasing containers a few at a time.
2. To our pipes and from there our waste water either goes to a septic tank or to a sewage system.
3. Turn off the water when you're brushing your teeth, save the water you don't use in the shower, and turn off the water when lathering up your soap or shampoo.
4. Zach B., Chris M.
5. The sun, which drives the water cycle, heats water in the oceans. Some of it evaporates as vapor into the air. Ice and snow can sublime directly into water vapor. The vapor rises into the air where cooler temperatures cause it to condense into clouds. Air currents move clouds around the globe; cloud particles collide, grow, and fall out of the sky as precipitation. Most precipitation falls back into the oceans or onto land, where, due to gravity, the precipitation flows over the ground as surface runoff. A portion of runoff enters rivers in valleys in the landscape.
6. Three.
7. Kyle E.
8. Took all the pictures for the drought portion of the site.
9. The drought cites are in all of the counties in north Georgia from Muscogee County on the Alabama line northeastward to Spalding County, and eastward to Lincoln County on the South Carolina line. The level four drought response also includes all of metropolitan Atlanta, Rome, Athens and Columbus, but does not include the cities of Macon and Augusta.
